SUBJECT INDEX TO VOLUME 8

A

Absorption

rate of, of ^3H -testosterone, into the embryonic chicken (*Gallus domesticus*), 435-442

in vivo, of xenoantiserum against chemically induced murine tumor, 107-118

Adherent cells, purified mouse peritoneal, as targets in mitogenic T-lymphocyte stimulation in replacement of lymphocyte-bound mitogens by nonmitogenic substances, 425-433

Adjuvant effect of liposomes, impairment of, by incorporation of lysolecithin, 381-396

Agarose-gel, method for preservation of lymphocyte rosettes in, 185-191
comparison of with hemocytometer method, 185, 188-189

Agglutinin

anti-T, molecular characteristics of, 400-405

peanut, fluorescent activated cell sorter using, 495-503

Albumin, sucrose gradients containing, isolation of stable aggregates of IgG by zonal ultracentrifugation in, 337-345

Alkaline phosphatase, heat-stable, experimentally induced autoantibody to in the baboon, 563-579

Allotransplant, kidney, effect of A on kidney immunogenicity in, in dogs, 167-172

Antibodies, human serum blood group T, isolation and characterization of types of agglutinins, 397-406

See also Agglutinins, anti-T

Antibody-forming cell (AFC) response, differential, effect of levamisole on in mice, 241-247

effect of varying doses on response to antigen, 241, 243-246

Antigen-antibody complexes, dissociation of, by means of negative van der Waals force, 11-29

Antigens

effect of on proliferation of IgG-forming plasma cells from mouse bone marrow cells, 516, 517, 524-528

examination of, in highly purified immune complexes, 545-553

I, i, HI blood group, presence of, in extracts of human erythrocytes in aqueous and butanol phases of inhibition of agglutination experiments, 505-509

T-dependent, enhancement by muramyl dipeptide of in vitro nude mice responses to, 55-64

Autoantibody, experimentally induced, to heat-stable alkaline phosphatase, in the baboon, 563-579

B

- Baboon studies, experimentally induced autoantibody to heat-stable alkaline phosphatase in, 563-579
- Biology students, outline in immunology for, (book review), 591-594
- Bone marrow cells, mouse, proliferation of IgG-forming plasma cells from, in vitro, 511-529

C

- Cancer diagnosis. See Human studies, cancer diagnosis in
- Cell division inhibitors, comparative effects of, on polyclonal stimulation according to the target cell used, 479-494
- Cells, natural killer, physico-chemical characteristics of tumor cells susceptible to lysis by, 73-83
- Cell sorter, fluorescent activated, separation of mouse T-cell subsets by, using fluorescence-labeled peanut agglutinin, 495-503
- T Cell rosette formation, effect of DEAE-dextran on, 145-154
- T-Cell serum, rabbit anti-human, use of nonimmunoglobulin bearing lymphocytes obtained by electrophoretic levitation for the elicitation of, 419-424
- T Cells, rabbit, properties of suppressor cell in the response of, to Concanavalin A, 155-165
- T-Cell subsets, mouse, separation of, by a fluorescent activated cell sorter using fluorescence-labeled pea-

- nut agglutinin, 495-503
- Chicken studies, embryonic (*Gallus domesticus*), rate of absorption of ^3H -testosterone into, 435-442
- Chromium release test (CRT), used to detect cytolysis and serum blocking for synergistic chemically-induced tumors in guinea pigs, 31-47
- effectiveness of, 44-47
- Clinical immunology, recent advances in, (book review), 123
- Colchicine, effects of on polyclonal stimulation induced by cell division inhibitors, 486-487, 491
- effect of on modification of kidney graft immunogenicity in a double transplant model, in dogs, 369-380
- detection of in the kidney, 375-377, 378-379
- effect of on separation of mouse T-cell subsets, 500, 501
- standard, effect of on modification of kidney immunogenicity in dogs, 167-172
- suppressed immune responsiveness to, in encephalomyocarditis-M-induced diabetes, in mice, 445, 448, 450, 452
- suppressor cell in the response of rabbit T cells to, 155-165
- evidence for the existence of, 155-156
- Connective tissue disorders in humans. See Human studies, connective tissue disorders
- Copolymer, random, ($\text{Glu}^{60}\text{Phe}^{40}$) plaque forming cell assay to measure immune response of mice to, 531-538
- Corneal cells, rat, relative capa-

- city of to stimulate allogeneic lymphocytes, compared with skin, kidney, heart, and lymphocyte cells, 303-311
- Cytolysis, detection of by chromium release test for syngeneic chemically-induced tumors, in guinea pigs, 31-47
- Cytolytic activity, in vitro, of lymph node cells, effect of blocking sera on, after exposure in vivo to tumor cells, in guinea pigs, 193-202
- Cytosine anabinoside, effect of on polyclonal stimulation induced by cell division inhibitors, 483-487
- Cytotoxic antibodies. See DR cytotoxic typing reagents
- Cytotoxicity, IgG-dependent, T lymphocyte populations as effector cells for, 213-224
- D
- DEAE-dextran, effect of on T cell rosette formation, 145-154
- "co-rosetting" in, 146, 148-149, 151, 152
- Diabetes, encephalomyocarditis-M variant (EMC-M)-induced, altered immune reactivity in, in mice, 443-455
- Dimethyl sulfoxide (DMSO), effects of on dissociation of antigen-antibody complexes, 11, 18-23
- Dog studies
- mongrel, modification of kidney graft immunogenicity in, with Concanavalin A in a double transplant model, 369-380
- modification of kidney, immunogenicity in, with standard Concanavalin A and its subfractions, 167-172
- DR cytotoxic typing reagents, sera from volunteers immunized by planned blood transfusions as a source of, 93-106
- E
- Effector cells, two T lymphocyte populations as, for IgG-dependent cytotoxicity, 213-224
- Electrophoresis, preparative, use of human T lymphocytes obtained by, for the elicitation of a rabbit anti-human T-cell serum, 419-424
- Encephalomyocarditis-M variant (EMC-M)-induced diabetes, altered immune reactivity in, in mice, 443-455
- Enzyme, immunoassay, quantitative, (book review), 227-228
- Erythrocytes, attachment of uniform salt forms of lipopolysaccharides from Salmonella abortus-equi to, and its inhibition by various animal sera, 85-92
- human, presence of I, i, and HI blood group antigens in extracts of, 505-509
- Ethylene glycol (EG), effects of on dissociation of antigen-antibody complexes, 11, 18-23, 27
- F
- Food dyes, See Tartrazine
- Foods, immunological aspects of, (book review), 229-230
- G
- Galactose oxidase, transformation

- of human lymphocytes by,
role of macrophages in,
407-418
- Gastrointestinal and liver dis-
ease, immunology of, (book
review), 581-582
- Glycosuria, development of in
enccephalomyocarditis-M-
induced diabetes in mice,
443, 447
- Guinea pig studies
Sewall Wright, strain 2, in
vivo effect of blocking
sera on tumor growth and
in vitro cytolytic acti-
vity of lymph node cells
of, 193-202
Sewall Wright, strains 13 and 2,
cell-mediated tumor im-
munity in, 31-47
- H
- H-2 allospecificities, "alien,"
presence of on leukemia
and lymphoma cells after
reaction of with chemi-
cally-induced sarcomas,
555-562
- Heart cells, rat, relative capa-
city of to stimulate al-
logeneic lymphocytes,
compared with corneal
cells, 303-311
- Hemocytometer method, comparison
of with agarose-gel
method for for preserva-
tion of lymphocyte ro-
settes, 185, 188-189
- HLA systems, (book review), 475-
476
- Human serum albumin (HSA), immune
response of, influence
of lysolecithin on, in
rabbits, 381-396
- Human serum blood group T anti-
bodies. See Antibodies
- Human studies
acute myeloid leukemia role of
monocytes in phagocyto-
sis and mixed leukocyte
reactivity in, 279-301
cancer diagnosis, simplified
cell microelectrophoretic
method applied to the
Macrophage Electrophor-
etic Mobility (MEM) test
for, 173-184
connective tissue disorders, ab-
normality of spontaneous
lymphokine synthesis by
lymphocytes of patients
with, 203-211
correlation of tartrazine hyper-
sensitivity with specific
serum IgD levels in, 65-71
healthy adults, stability of
peripheral blood lympho-
cyte count and E-rosette
forming lymphocytes in,
313-323
lymphocytes. See Lymphocytes,
human; Peripheral blood
lymphocyte count
T lymphocytes. See T Lymphocytes,
human; T Lymphocyte pop-
ulations, human
neutrophils. See Neutrophils,
human
sera. See Sera, human
See also Lupus erythematosus,
systemic
- Humoral immune response, suppres-
sion of, by particulate
material extracted from
spleen cell subpopulations
of tumor-bearing mice,
131-143
- Hypersensitivity, tartrazine. See
Tartrazine hypersensiti-
vity
- I
- IgD levels, serum. See Serum IgD
levels
- IgE antibody response. See Serum
IgE antibody response
- IgG-dependent cytotoxicity. See
Cytotoxicity, IgG-dependent

- [¹²⁵I]IgG, stable aggregates of, isolation of, by gel filtration or zonal ultracentrifugation in sucrose gradients containing albumin, 337-345
- Immune complexes, highly purified, examination of antigens in, 545-553
- Immunoanalysis, automated (book review), 222-226
- Immunobiology of Neisseria gonorrhoeal, (book review), 235-236
- Immunochemistry, methods in, (book review), 477-478
- Immunogenetics, basic, (book review), 365-366
- B cell and T cell priming in, 327-331, 332-333
- Immunological methods (book review), 587-589
- Immunology, (book reviews), 592-593, 594
- Immunology, dictionary of, (book review), 233
- Immunology, essential, (book review), 592
- Immunology, essential concepts in, (book review), 594
- Immunology and immunochemistry, methods in, (book review), 477-478
- Immunology, an outline for students of medicine and biology, (book review), 591-594
- Immunology, textbook of, (book review), 593-594
- Indomethacin, effect of on encephalomyocarditis-M-induced diabetes in mice, 448, 453
- Infection, immunity, and genetics, (book review), 473-474
- K
- Kidney cells, rat, relative capacity of to stimulate allogeneic lymphocytes, compared with corneal cells, 303-311
- Kidney graft immunogenicity, effect of Concanavalin A on modification of, in a double transplant model, in dogs, 369-380
- Concanavalin A and its subfractions, in dogs, 167-172
- L
- Laboratory animals, inbred and genetically defined strains of, mouse and rat, (book review), 585
- Leishmania braziliensis, effect of peritoneal macrophages from mice injected with, on in vitro growth of tumor cells, 457-468
- Leukemia, acute myeloid. See Human studies, acute myeloid leukemia
- Leukocyte chemotaxis, methods, physiology, and chemical implications of, (book review), 119-121
- Leukocyte reactivity, mixed, effect of monocytes on, in human acute myeloid leukemia, 279-301
- Leukocytes, normal, transformed, and leukemic, (book review), 129-130
- Levamisole
- effect of on differential antibody forming cell response in mice, 241-247
- effect of on encephalomyocarditis-M-induced diabetes in mice, 446, 447-448, 451-452
- Lipopolysaccharide (LPS)
- bacterial, solid-phase radioimmunoassay for, 347-364
- effect of lysozyme complexed or admixed with, 325-336
- Salmonella abortus-equi derived, attachment of uniform salt

- forms of to erythrocytes, and its inhibition by various animal sera, 85-92
- Liposomes, impairment of adjuvant effect of, by injection of lysolecithin in rabbits, 381-396
- Liver disease, immunology of, (book review), 581-582
- Lupus erythematosus, systemic, examination of antigens from immune complexes from patients with, 545-553
- Lymph node cells, cytolytic activity in vitro of, after exposure in vivo to tumor cells suspended in blocking sera, 193-202
- Lymphnodectomy, prolongation of mouse skin allograft by, following transplantation, 249-262
- Lymphocyte rosettes
isolation of T lymphocytes from non-T lymphocytes by formation of, 49-54
method for preservation of, in agarose-gel, 185-189
comparison of with hemocytometer method, 185, 188-189
See also Lymphocytes, E-rosette forming
- Lymphocyte cells, relative capacity of to stimulate allogeneic lymphocytes, compared with corneal cells, 303-311
- Lymphocyte count. See Peripheral blood lymphocyte (PBL) count
- Lymphocytes
abnormality of spontaneous lymphokine synthesis by, of patients with connective tissue disorders, 203-211
allogeneic, relative capacity of corneal, heart, kidney, skin, and lymphocyte cells to stimulate, 303-311
human
E-rosette forming, stability of, 313-323
preparative electrophoresis of, 419-424
role of macrophages in galactose oxidase induced transformation of, 407-418
nonimmunoglobulin bearing, use of for the elicitation of rabbit anti-human T-cell serum, 419-424
- T Lymphocytes, human
as effector cells for IgG dependent cytotoxicity, 213-224
isolation of, by a rosette technique to deplete non-T lymphocytes, 49-54
- T-lymphocyte stimulation, mitogenic, adherent cells as targets in, in replacement of lymphocyte-bound mitogens by nonmitogenic substances, 425-433
- Lymphokine synthesis, spontaneous, abnormality of, by lymphocytes of patients with connective tissue disorders, 203-211
- Lysis, physicochemical characteristics of tumor cells susceptible to, by natural killer (NK) cells, 73-83
- Lysolecithin, adjuvant effect of liposomes by injection of, in rabbits, 381-396
- Lysozyme, complexing or admixing of, with lipopolysaccharide, 325-336
- M
- Macrophage Electrophoretic Mobility (MEM) test, simplified cell microelectrophoretic method applied to, for cancer diagnosis, 173-184

Macrophages

peritoneal, effect of in vitro
growth of tumor cells
from mice injected with
Leishmania braziliensis,
457-468

role of in galactose oxidase
induced transformation of
human lymphocytes, 407-
418

role of in impairment of the
adjuvant effect of lipo-
somes by incorporation of
lysolecithin, in rabbits,
381-396

Medical students, outline in im-
munology for, (book re-
view), 591-594

Medical virology, notes on, (book
review), 471-472

Mice studies

A/J and CAF₁, contribution of
B and T lymphocytes to
immunological memory state
induced by lysozyme-lipo-
poly saccharide mixtures
and complexes studied in,
325-336

A/J and CBA/J, prolongation of
skin allograft in, by
splenectomy and lymphno-
dectomy following trans-
plantation, 249-262

Balb/c

adherent cells of, as targets
in mitogenic T-lympho-
cyte stimulation, 425-433

tumor-bearing, suppression of
humoral immune response
by particulate material
extracted from spleen cell
subpopulations of, 131-
143

BDF₁

nude, enhancement of in vitro
responses of to a T-depen-
dent antigen by muramyl
dipeptide, 55-64

separation of T-cell subsets
of, by fluorescent acti-
vated cell sorter using

fluorescence-labeled pea-
nut agglutinin, 495-503

physicochemical characteris-
tics of tumor cells sus-
ceptible to lysis by
natural killer (NK) cells
studied in, 73-83

varying effect of cell divi-
sion inhibitors on poly-
clonal activation accord-
ing to the target cell
used, in, 479-494

C3H/Helta, cross-reactivity of
alien H-2 allospecificities
between chemically-
induced tumors, thymus,
leukemia, and lymphoma
cells in, 555-562

C3H/HeJ and C57BL/6J, effect of
peritoneal macrophages
from, injected with
Leishmania braziliensis,
on in vitro growth of
tumor cells, 457-468

C57BL/6, proliferation of plasma
cells from bone marrow of,
in vitro, 511-529

C57BL/6/J, effect of Levamisole on
differential antibody
forming cell response in,
241-247

DBA/2j, altered immune reactiv-
ity in encephalomyocar-
ditis-M variant (EMC-M)-
induced diabetes in, 443-
455

mixed strains

analysis of tumor specificity
of tumor specific anti-
sera in different immune
tests in, 107-118

plaque forming cell assay to
measure immune response
of, to the random copoly-
mer (Glu⁶⁰Phe⁴⁰), 531-538

SWR-J, mite infested, IgE anti-
body response of to mite
antigens, 1-9

See also laboratory animals
Microelectrophoretic method, sim-
plified cell, applied to

- Macrophage Electrophoretic Mobility (MEM) test for cancer diagnosis, 173-184
- Mite, mouse (Myocoptes musculus), IgE antibody response to mite antigens in mice infested with, 1-9
- Mitogens, lymphocyte-bound, replacement of by nonmitogenic substances, in mitogenic T-lymphocyte stimulation, 425-433
- Mitogens. See also Concavalin A
- Monocytes, role of in phagocytosis, in human acute myeloid leukemia, 279-301
- Muramyl dipeptide, enhancement of in vitro nude mice responses to a T-dependent antigen by, 55-64
- Mycoplasma pneumoniae antigen, kinetics of cellular and humoral response of rabbits immunized with, 263-277
- Mycoplasma salvarium antigen, responses to various concentrations of, in rabbits immunized with Mycoplasma pneumoniae, 266-267, 270-271, 272, 275

IMMUNODIAGNOSIS OF CANCER

(in two parts)

(Immunology Series, Volume 9)*

PART 2

edited by

ROBERT B. HERBERMAN and K. ROBERT MCINTIRE

National Cancer Institute, Bethesda, Maryland

September, 1979

576 pages, illustrated

Immunodiagnosis of Cancer, Parts 1 and 2 represent the first comprehensive compilation of immunodiagnostic tests for cancer, both those that are now available and those currently being evaluated for their potential usefulness. This two-part book provides detailed and critical analyses of the various tests and discusses their different aspects, the most recent advances, and the theoretical basis for approaches, current problems, and limitations. The direction of needed studies is suggested in many ways; articles have also been included to aid in the design of appropriate clinical studies, especially the statistical evaluation of diagnostic assays.

The contributors to *Immunodiagnosis of Cancer, Parts 1 and 2* are acknowledged experts in their respective specialties, and the editors have stressed the rapid submission of articles, so that these volumes may be as up-to-date as possible. With the publication of this book, tumor immunologists, clinical and surgical oncologists, and biochemists now have a reference to the current status of the field that can be used in the development of immunodiagnostic tests and in the application of these tests to the patient.

CONTENTS (Part 2)

Depressed Immunologic Competence — E-Rosette Formation in Immunodiagnosis, *William H. West*. Skin Tests, *Carl M. Pinsky*. Application of the Microculture Lymphocyte Proliferation Assay to Clinical Studies, *Jack H. Dean*. Mechanisms in Immunosuppression in Cancer, *Holger Kirchner*.

Humoral Responses to Tumor-Associated Antigens — Burkitt's Lymphoma and Nasopharyngeal Carcinoma, *George Klein*. Immunodiagnosis of Human Sarcomas, *Yashar Hirschaut*. Melanomas, *Wendell D. Winters*. Herpes Simplex-Associated Antigens, *André J. Nahmas* and *Robert B. Ashman*. Leukemia-Associated Antigens, *Dean L. Mann*. The Makari Skin Test as an Immunodiagnostic Technique, *James L. Weese*. Immune Complexes Associated with Neoplasia, *Argyrios N. Theofilopoulos* and *Frank J. Dixon*.

Cell-Mediated Immunity to Tumor-Associated Antigens — Delayed Hypersensitivity Skin Tests with Tumor Extracts,

Robert K. Oldham and *Ronald B. Herberman*. Leukocyte Migration Inhibition, Cell Migration Inhibition Systems: Mechanism and Approaches to Improving Their Assay, *Ross E. Rocklin*. Clinical Applications of Assays of Leukocyte Migration Inhibition, *James L. McCoy*. Lymphocyte Stimulation (by Autologous Tumor Biopsy Cells), *Farkas Ványó* and *Jan Stjernswärd*. Cell-Mediated Cytotoxicity in Humans. A Critical Review of Experimental Models and Clinically Oriented Studies, *Guy D. Bonnard* and *William H. West*. The Macrophage Electrophoretic Mobility Test, *A. Munro Neville*, *Christopher Turberville*, and *J. Anthony Forrester*. Leukocyte Adherence Inhibition, *Denis R. Burger*.

Subject Category: 18.4, Immunology

PREVENTION AND DETECTION OF CANCER

(in two parts comprising four volumes)

edited by HERBERT E. NIEBURGS

Mount Sinai School of Medicine, The City University of New York

Order Now!

Prevention and Detection of Cancer is published in two parts, comprising four volumes as follows:

Part I (in two volumes): Prevention

Volume 1: Etiology 1216 pages, 1977.

ISBN: 0-8247-6491-9

Volume 2: Etiology; Prevention Methods
1232 pages, 1978.

ISBN: 0-8247-6682-2

Part II: (in two volumes): Detection

Volume 1: High Risk Markers; Detection
Methods and Management
1328 pages, 1978.

ISBN: 0-8247-6683-0

Volume 2: Cancer Detection in Specific
Sites 1260 pages (approx.), 1979.

ISBN: 0-8247-6684-9

Complete table of contents for entire symposium is available from the publisher upon request.

Part II: DETECTION

Volume 2: Cancer Detection in Specific Sites

Providing a comprehensive review of the latest advances and current state of knowledge on primary and secondary prevention of cancer, *Prevention and Detection of Cancer* contains over 400 articles by leading experts in various fields of oncology throughout the world. The large number of outstanding manuscripts has resulted in a work that integrates data of diverse disciplines for the benefit of experimental oncologists, epidemiologists, immunologists, pathologists, clinicians, educators, socioeconomists, and all those who are involved with cancer control.

Part I: Prevention (in two volumes) is devoted to recent progress in experimental oncology, offering the researcher a valuable and extensive overview and to the clinician basic information of importance for the practice of cancer prevention and detection. The 29 chapters contain reports on: the multiplicity of etiologic factors and their interaction; genetic and acquired susceptibility; the role of predisposing diseases and of potentially malignant lesions; the natural history of cancer; genetic, biochemical, and morphological markers of human neoplasms; identification of environmental and occupational hazards; methods of professional and public education.

Part II: Detection (in two volumes) is directed to cancer detection methods in general, diagnostic and prognostic procedures, and detection of asymptomatic tumors in specific sites. Relevant experimental findings are integrated with clinical oncology. Various cancer detection methods are evaluated according to sensitivity and specificity, and feasibility of use for different sites. The final volume deals with specific sites and provides information on diagnostic methods and on the management of detected cases. All chapters include numerous carefully selected reports. Breast and uterine cervix are extensively described, as are head and neck, respiratory system, stomach, colon-rectum, liver, pancreas, kidney, urinary bladder, ovaries, prostate, and lymphoma-leukemia.

INSTRUCTIONS FOR PREPARATION OF MANUSCRIPTS FOR DIRECT REPRODUCTION

IMMUNOLOGICAL COMMUNICATIONS is a bi-monthly journal in the English language for the rapid communication of immunological information.

Directions for Submission to IMMUNOLOGICAL COMMUNICATIONS

One manuscript suitable for direct reproduction (see Instructions for Preparation), carefully inserted in a folder, and two copies of the manuscript must be submitted.

Reprints

Owing to the short production time for articles in this journal it is essential to indicate the number of reprints required upon notification of acceptance of the manuscript. Reprints are available in quantities of 100 and multiples thereof, in addition to the twenty (20) free copies provided to the senior author with orders of 100 or more reprints; a reprint price list will be sent to the senior author with the notification of acceptance of the manuscript.

Manuscripts should be mailed to:

Editorial Office, The Center for Immunology
203 Sherman Hall, School of Medicine
State University of New York at Buffalo
Buffalo, New York 14214

INSTRUCTIONS FOR THE PREPARATION OF MANUSCRIPTS

Since all the contributions are reproduced by direct photography of the manuscripts, the following instructions must be strictly adhered to. Non-compliance will result in the return of the manuscript to the author(s) and delay in its publication.

Typing Instructions

1. Manuscript must be typewritten, double spaced, on good quality white bond paper measuring at least 8½ x 11 inches.
2. It is essential to use a black typewriter ribbon in good condition so that a clean and clear impression of the letters is obtained. Erasure marks, smudges, creases, etc., should be avoided. (Errors may be corrected by using white opaque correcting fluids or tapes).
3. All formulas and equations should be typed in or carefully prepared in permanent black ink, using drawing instruments.
4. The typing area of page 1, including the title, should be 6¼ by 8½ inches and that of all other pages 6¼ x 9½ inches. Make maximum use of the typing area.
5. Tables should be typed as part of the text but in such a way as to separate them from the text by a three-line space at both top and bottom of each table. The title "TABLE" (capitalized and followed by a Roman number) should precede the table and be centered on the page. Care should be taken that a table does not overlap onto the next page.
6. Drawings, graphs and other numbered figures should be drawn in black India ink (do not use blue ink) on a separate piece of white paper. Photographs should be glossy prints. Lettering set should be used for all labels on the figures or photographs; a typewriter may be used for labels. Captions for the figures should be

typed (single spaced) on a separate sheet, along the full width of the type page. The indication "FIGURE" should be capitalized and, with the figure's number (in Arabic numerals), centered above the caption. The numbers of the figures or photographs as well as the name(s) of the author(s) should be written in blue pencil on the back; the top of the picture should also be indicated on the back. The author(s) should indicate (with a blue pencil) the places in the text where the picture(s) should be inserted.

7. References (including footnotes) in the text will be numbered consecutively by numbers in parentheses. The full references (and footnotes) will be collected at the end of the text. The last names of all authors to any one paper, followed by their initials, shall be quoted. The title of the journal (Chemical Abstracts abbreviations), the volume number (underlined), the first page and the year should follow, in that order. Books should be cited similarly and include the publisher's name and location along with the year and edition of the book. Articles or chapters in books should be cited similarly and include the name of the editor(s) of the book and the page on which the article begins, as well as the volume number.

(journal): Thrasher, S. G., Doroszczak, N. and Cohen, S., J. Immun., 107:1394, 1971.

(book): Pressman, D. and Grossberg, A. L., The Structural Basis of Antibody Specificity. W. A. Benjamin, Inc., New York, 1968.

(article in a book): Milgrom, F., in International Convocation on Immunology, edited by N. R. Rose and F. Milgrom, p. 270, S. Karger, New York, 1969.

Format of Manuscripts

1. The entire title should be in capital letters and centered on the width of the typing area, at least two inches from the top of the page. This is followed by a one-line space and then by the name(s) and address(es) of the author(s), in the following way:

AUTOIMMUNE RESPONSES TO THYROGLOBULIN IN THE RAT

T. J. Atkins and H. Z. Ginsberg
Departments of Microbiology and Pathology,
School of Medicine, State University of New York
at Buffalo, Buffalo, New York 14214

2. The title and the name and address of the author(s) are followed, after a three-line space, by an abstract, comprising less than 10% of the length of the text of the article. The abstract must be typed single-spaced and headed "Abstract".
3. After a three-line space, the article itself commences, whenever possible subdivided into sections such as "Materials and Methods," "Results," "Discussion," "Acknowledgments" and "References." The headings should be centered, underlined, and separated by one extra line space from the typed material that precedes and follows it.
4. Each page of manuscript should be numbered lightly at the bottom of the sheet, with a blue pencil.
